There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters (ters ((b)(1) – (b)(12)): ⁴					
Exclusion Name	Exclusion	n Size	Exclusion ⁵	Rationale for Exclusion Determination		
Wetland W Wetland E	0.1	acre(s)	(b)(1) Non-adjacent wetland.	The review area includes two wetland areas identified as Wetland W and Wetland E that extend outside of the project review area. The wetlands do not abut at least one point or side of, a paragraph (a)(1)-(3) water. The wetlands are located in a depressional area with no perennial or intermittent surface water connection to a downstream water. The closest tributary as shown on the USGS NHD map is an unnamed tributary approximately 1,700 feet west of the wetlands. Based on the USGS Topographic map, FEMA maps, and elevation contours, the wetlands would not be flooded by an (a)(1)-(3) water in a typical year. Based on this review, the wetlands are not jurisdictional under the Navigable Waters Protection Rule because they meet the requirements of the exclusion for non-adjacent wetlands under paragraph (b)(1).		

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

\times	Information submitted by, or on beha-	alf of, the	applicant/consultant:	MN WCA	Application 1	or No	Loss o	r
Exe	emption submitted by applicant dated	May 25.	2021.					

This information is not sufficient for purposes of this AJD.

Rationale: Additional information was needed to determine if the wetlands could share surface water connection with an a(1)-a(3) water

	connection with an a(1) a(0) water
	Data sheets prepared by the Corps: Title(s) and/or date(s).
\boxtimes	Photographs: Aerial: submitted with application.
	Corps site visit(s) conducted on: Date(s).
	Previous Jurisdictional Determinations (AJDs or PJDs): ORM Number(s) and date(s).
	Antecedent Precipitation Tool: provide detailed discussion in Section III.B.
	USDA NRCS Soil Survey: Title(s) and/or date(s).
\times	USFWS NWI maps: Accessed via MVPMap Portal June 14, 2021

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
